- Customer service.

UNIVERSITY PROJECTS

HotelBeachSA (.NET, C#, .NET MVC): Beach S.A. is a hotel management platform developed as a university project. It allows administrative staff to register guests, manage room availability, and efficiently manage reservations through a streamlined interface.

API Web HotelBeachSA (.NET, C#, .NET MVC): I developed an API to manage clients, packages, and reservations. I optimized its performance, reducing response time by 20%. I implemented MVC architecture to improve system scalability. This reduced maintenance times by 30%.

TuLook (PHP, Laravel, React, JavaScript): TuLook is a platform that connects hairstylists and barbers with their clients. Professionals can create profiles, offer services, and manage bookings, while clients can explore options, check availability, and schedule appointments directly.
